

## **Brief Details of LLC Workshops in the Spring Session 2019**

### **Beginners Workshops:**

#### **Copper Enamelling**

This Workshop is for people who have no prior experience of enamelling on copper. The techniques of producing attractive items on copper will be taught along with the important safety information that goes along with working with powdered enamel, and extremely hot kilns. There will be a wide range of coloured enamels and pre-cut copper shapes to buy at cost.

#### **Casting Workshop**

This Workshop will cover how to sand cast in silver using wooden and aluminium moulds. No prior experience is necessary, and the tools will be provided. It is expected however that students will bring their own scrap or casting silver, although there will be a small amount of casting silver for sale.

#### **Lapidary**

This Workshop is for people with no Lapidary experience. The tutors will teach the lapidary skills required to prepare a flat or cabochon stone; using saws and grinders and laps, then polishing it using laps. The stone will be provided. The aim is for students to leave with a finished stone.

### **Intermediate Workshop:**

#### **Bowls and Sgraffito Enamelling**

This Workshop is for people who have some experience of enamelling and would like to expand their knowledge of enamelling with bowls and the technique of sgraffito. Students could do 2 bowls, one sifted and one wet process with the enamel drawn into. Copper bowls will be available for purchase from £3.75 each.

### **For LLC Members Only:**

#### **Casting Session**

This Session is for LLC Members with some experience of sand Casting with silver, who would like more experience of this skill taking advantage of the facilities in The Club along with other Members who can help if necessary.
